SUMMARY

B.Tech CS student at VIT Bhopal (CGPA 8.82) with a genuine interest in fintech, payments, and capital markets. I enjoy picking apart how financial systems work — whether that's modeling credit risk, following payment infrastructure news, or building ML projects around real financial data. Looking to bring my Python and quantitative skills into an analyst role where I can learn fast and contribute early.

EDUCATION

VIT Bhopal University — B.Tech in Computer Science | **CGPA: 8.82 / 10**

Relevant coursework: Data Structures, Probability & Statistics, Machine Learning, Linear Algebra

PROJECTS

Credit Card Approval Prediction — FinTech ML Project

- Used Kaggle's credit dataset to build an approval prediction pipeline — Gradient Boosting outperformed the Logistic Regression baseline by ~8% accuracy.
- Explored features like income, credit history, and debt ratio; directly maps to underwriting logic used in real lending platforms.
- Tools: Python, scikit-learn, Pandas, Matplotlib

Vaani — AI-Powered Investment Intelligence Platform — Personal FinTech Project | JavaScript, React

- Built a full investment intelligence system with four scoring frameworks (business quality, valuation, macro, sentiment) combined into a single Investment Opportunity Score (IOS) to rank stocks for capital allocation.
- Integrated Claude API for AI-generated thesis output, FinBERT for news sentiment and narrative shift detection, and a LangChain agentic layer for autonomous portfolio monitoring and post-trade review drafting.

Aerial Plant Disease Detection — ML/DL Classification

- Built a CNN-based classifier on aerial crop images to detect leaf disease across multiple categories.
- Experimented with data augmentation to handle imbalanced classes and improve accuracy across disease types.
- Tools: Python, TensorFlow, Keras

SKILLS

Finance & Domain: Payments industry, FinTech research & analysis, financial modeling, credit risk basics

Technical: Python, Pandas, NumPy, scikit-learn, TensorFlow, Keras, SQL (basic)

Other: Quantitative reasoning, data interpretation, team coordination, written communication

CERTIFICATIONS & LEARNING

- Machine Learning Specialization – DeepLearning.ai (Andrew Ng) | In Progress
- Frontend Web Development – Code with Random | Aug 2024
- AIML Contest – VIT Bhopal | Jan 2025 — competed against departmental peers in applied ML problems
- Java Web Development Contest – VIT Bhopal | May 2025

ACTIVITIES & INTERESTS

- Track fintech news regularly — follow companies like Razorpay, PhonePe, and Stripe to understand how payment infrastructure is evolving in India and globally.
- Read about the intersection of finance and technology; currently reading about UPI 2.0 credit features and how they're changing consumer lending.
- Part of the Gujarati Club at VIT Bhopal — helped coordinate 4+ cultural and community events over the past year.
- Participate in stock market simulations and follow quarterly earnings of Indian fintech and NBFC stocks.
